

#### NOTE TO ALL BUYERS:

Bulldog On-Site Solutions has been selected as the exclusive rigger / removal agent for the Sumitomo auction site via The Levy Recovery Group. It should be made clear that we are an independent and privately owned company, and are not being hired direct by the auctioneer, nor are we directly affiliated with the auctioneer. However, due to site and timing constraints, it was decided that one rigging/removal company could produce a better avenue for safety and quality of service for the buyers.

Please note that this only pertains to work requiring a forklift, special preparations, disassembly, etc. As always, you are welcome to pick up and handle those purchases that are "hand held" or carry-able, and this can be setup with the auction company representative Al Devine. However, for other assets requiring assistance, please reference below.

#### UNDERSTANDINGS:

If you are removing your own items, such removal must be completed during the first week after the sale.

Costs posted online include disconnect from utilities, draining of applicable fluids, disconnect and match marking of interconnects, and loading on your provided trucks.

BOS can provide you with a quote for transportation and installation as well, but this will be on your request and not provided until after December 25<sup>th</sup>.

BOS will immediately begin dismantling and packaging of items upon the conclusion of the sale. If your item(s) requires any special instructions for shipping/preparation (especially for those items technical in nature) it is your responsibility to immediately notify BOS via email at the contact information found below.

Any special requests for: packaging, excess dismantling, specialized handling instructions, etc. must be communicated to BOS immediately upon the end of the sale, and BOS will advise of any pricing changes associated with your requests. Otherwise, items will be dismantled only to the extent needed to load on trucks.

#### INSTRUCTIONS:

No further action is necessary until you are contacted by a BOS representative to coordinate pickup of your items.

Upon notification that your items are ready, you will be given a time slot to provide your truck to the facility for loadout. All efforts will be made to work with everyone on timing, and transportation services can be provided upon request.

Your items will not be released from the site until the auction company confirms you are paid in full, and until BOS receives payment in full for its services.

If your item does not have an associated price, there are either special exceptions (contact BOS for detail) or they are basic "pallet type" picks. These "pallet type" picks are \$60 each, or \$120 each including skidding and shrink wrap.

If you have multiple “pallet type picks”, or other groupings of small purchases (such as storage cabinets or shelves full of supplies, our services are for time and material only. We will put two men and a small forklift on your items at the rate of \$220/hour until completed.

No floor steel, power leads, or structural steel is included in the rigging price.
